Summary

Software Engineering Intern specializing in Full-Stack and Applied AI, with hands-on experience building production systems using Python, TypeScript, Flutter, PostgreSQL, LLMs and RAG. Contributed to a government field-operations platform supporting 10,000+ locations and thousands of users, alongside deployed AI applications for document auditing and data analysis.

Technical Skills

Languages: Python, TypeScript, Dart, Kotlin, Java, C++, C
AI/ML: LLMs, AI Agents, RAG, Prompt Engineering, NLP, PyTorch, Machine Learning, Deep Learning, Vector Search
Development: Flutter, FastAPI, Flask, LangChain, REST APIs
Data & Databases: PostgreSQL, Prisma, Supabase, Pandas, NumPy, Vector Databases
Cloud & Tools: GCP, AWS, Azure, Git, GitHub

Experience

Software Engineering Intern — Full Stack & AI **Sep 2026 – Present**
IT Cell, Hyderabad | Government of Telangana
Ganesh Bandobust 2026 — Large-Scale Field Operations & Digital Policing Platform

- Engineering a production-scale platform supporting 10,000+ GPIDs/mandaps and thousands of field users.
- Built hierarchy-based access across Commissionerate → Range → Zone → Division → Police Station → Sector/Cluster → GPID.
- Developed mobile workflows in Flutter/Dart and web/backend services using TypeScript, REST APIs, PostgreSQL, and Prisma.
- Implemented QR/GPID verification, GPS validation, geo-tagged evidence, timestamps, and audit-ready field inspections.
- Designed optimized GPID search and jurisdiction filtering, including Police Station-scoped and suffix-based lookup.
- Built real-time location monitoring and operational dashboards for supervisory tracking.
- Designed backend models and APIs for daily visits, officer assignments, inspection targets, and compliance tracking.
- Contributed to a live government production system through feature development, debugging, release builds, Git workflows, and production issue resolution.

Education

ACE Engineering College, Hyderabad **2023 – 2027**
B.Tech, Artificial Intelligence & Data Science — GPA: 8.2 / 10

Telangana State Board **2021 – 2023**
Class 12th (MPC) — Grade: A

Projects

AI-Document-Auditor – AuditLens AI [GitHub] [Live Demo]
Python, LangChain, RAG, FAISS, HuggingFace, Groq, Streamlit

- Solved slow and error-prone manual auditing of legal, financial, and code documents by building an evidence-grounded AI auditing system.
- Engineered RAG using all-MiniLM-L6-v2, FAISS retrieval, configurable LLM inference, and source-chunk traceability for structured, verifiable findings.
- Delivered a deployed multi-format auditor generating risk, obligation, missing-information, and evidence reports with source-backed findings.

DataLens-AI – Intelligent Data & Document Analysis [GitHub] [Live Demo]
Python, Agno, DuckDB, Pandas, Gemini, OpenAI, Streamlit

- Solved the complexity of heterogeneous business data analysis by building an AI platform for natural-language analysis of CSV, Excel, PDF, and PowerPoint files.
- Engineered AI workflows combining DuckDB, Pandas, document processing, and multi-provider LLMs to transform natural-language questions into analytical insights and visualizations.
- Delivered a deployed Streamlit application enabling users to query datasets, summarize documents, and generate actionable insights through natural-language interaction.

AlphaCast – Trading Signal Engine [GitHub] [Live Demo]
TypeScript, Real-Time Data Processing, Monad Blockchain, APIs, Supabase

- Solved crypto trading signal noise by filtering activity through trusted Farcaster wallet identity instead of anonymous sources.
- Unified Neynar identity data, Envio on-chain indexing, and 0x/Kuru DEX APIs into a real-time pipeline for wallet activity and trade intelligence.
- Delivered trust-verified buy, sell, and mint alerts on Monad Testnet, reducing the need for manual wallet monitoring.

Volunteering

Campus Ambassador – Cognizance, IIT Roorkee **Jan 2026 – Mar 2026**
Annual Technical Fest — Telangana, India

- Drove a 25–30% increase in registrations via targeted outreach, reaching 300+ students and coordinating across 5+ student clubs.

Google Student Ambassador – Google Student Ambassadors India **Aug 2025 – Dec 2025**
Workshops, Hackathons & Tech Talks (Cloud, AI/ML, Android) — India

- Delivered 25–40% higher engagement across events, promoted Google certifications, and grew a peer-learning community campus-wide.

Programmes & Leadership

McKinsey Forward Programme – McKinsey & Company **Apr 2026 – Jun 2026**
Online / Global

- Developed structured problem-solving, data-driven decision-making, and leadership skills in a globally competitive cohort.

Certifications

- Oracle Cloud Infrastructure – Oracle
- Data Analysis Using Python – IBM / Coursera
- Microsoft Azure AI Fundamentals (AI-900) – Microsoft
- Prompt Engineering For Everyone – DeepLearning.AI
